

45 years of building excellence

Founded in 1969, Concept® Homes is still owned and operated by the Hinteregger family. Their sound business practices and commitment to trades, suppliers, staff and customers produce quality homes at reasonable prices. We are grateful for our community's support, and as such we sponsor local charities, build homeless housing projects and help STARS build their lottery homes. This contribution is our way of showing our appreciation for the neighbourhoods we work and live in.
